

Technology Consultant

Polaris Management Partners (Polaris) is currently expanding its technology practice. We have an opportunity for a technology focused consultant, experienced in full lifecycle technical implementations as well as process reengineering and project management or product management.

Polaris is a management consulting firm that provides consulting services for the life science industry. Our clients include 14 of the 15 largest global pharmaceutical companies, as well as other smaller pharmaceutical firms and medical device and biotech firms.

We are a small, rapidly growing company with an entrepreneurial culture. The Polaris team includes members with experience from top consulting firms (e.g., Accenture, Boston Consulting Group, Deloitte), and pharmaceutical firms (e.g., Pfizer, Merck).

Polaris provides a range of consulting offerings, focusing on healthcare compliance, process optimization, process review, and technology. Polaris has developed an industry reputation as an elite firm with specialized industry knowledge, experience and solutions.

At Polaris, you will have an opportunity to work directly with senior executives at leading pharmaceutical companies. From the beginning, consultants are expected to develop solutions, lead parts of client presentations, and manage project work streams. All Polaris team members have the opportunity to experience diverse and challenging consulting projects.

As a small company, we are committed to offering promotion opportunities based on individual merit. Employees are expected to contribute to and help shape the company's future direction and success.

Responsibilities include:

- Supporting and eventually managing implementation projects
- Meeting with clients and developing business requirements
- Manage relationship with external vendors (developers, infrastructure, etc.)
- Responsibility for project deliverables, from requirements through testing and training
- Assisting as a technical expert in traditional consulting projects
- Assisting as a technical resource in sales efforts
- Assisting with internal IT strategy and implementation
- Serving as an internal technology expert (assist other consultants with applications, etc.)
- Assisting with identifying and developing new technology offerings
- Developing relationships with clients and identifying opportunities

Candidate's profile:

- Minimum 2-4 years of work experience, preferably within IT consulting (Big 4/5 experience preferred, but not required)
- Undergraduate degree or equivalent experience.
- Experience with full lifecycle system implementations (requirements, build, testing, training)
- Specific technologies (preferred, not required): ASP.NET, SQL, Java, Windows Architecture [IIS, Windows Server], Microsoft Office Expertise, SAP/Oracle Apps
- Entrepreneurial, well organized, self-motivated, team player
- Client facing skills and project management experience/interest a plus
- Technology focused, but interested in business and traditional management consulting
- Willingness to have a different opinion, ability to articulate thoughts and concepts well
- Experience or knowledge of pharmaceutical industry a plus
